Investment Strategy

- Invests in high-yield, high-risk bonds and other debt obligations or preferred securities, with a focus on "junk bonds" rated within or below the "Ba" category as defined by Moody's.
- Emphasizes middle-tier high-yield bonds while minimizing exposure to more speculative high-yield bonds.
- Uses smaller allocations to convertible and preferred securities to reduce volatility and enhance total return potential.

*Performance data cited represents past performance and should not be viewed as an indication of future results. Investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-THRIVENT or visit Thrivent.com for performance results current to the most recent month-end.

Lipper figures do not include sales charges or fees. If included, returns would have been lower. The Barclays Capital U.S. Corporate High Yield Bond Index is an index which measures the performance of fixed-rate non-investment grade bonds. An index is unmanaged, and investments cannot be made directly into an index.

For additional performance information, visit Thrivent.com, Mutual Funds & Investments, Mutual Funds and choose a fund from the list. For example, Morningstar star ratings and Lipper, Inc. peer rankings can be found on the Statistics tab.

Fund Management

Paul J. Ocenasek, CFA
Began managing this fund: 1997
Investment experience: 23 years

Risks: The Fund typically invests a majority of its assets in high-yield bonds (commonly referred to as junk bonds). Although high-yield bonds typically have a higher current yield than investment-grade bonds, high-yield bonds are also subject to greater price fluctuations and increased risk of loss of principal than investment-grade bonds. These and other risks are described in the Fund's prospectus.

Bond Quality Rating Distribution⁴

¹This is subject to change.

²Average Life: Average length of time before the bond issuer pays the bond holder.

³Standard Deviation: A statistical measure of volatility. The higher the standard deviation, the riskier an investment is considered to be.

⁴Bond Quality Ratings Distribution: Thrivent Financial uses the most recent quarter-end credit ratings assigned by Moody's Investor Services, Inc. and Standard & Poor's Financial Services, LLC to issuers of individual securities in the Fund. When the agencies' ratings differ, Thrivent Financial uses the lower of the two ratings.
