**Performance data cited represents past performance and should not be viewed as an indication of future results. Investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-THRIVENT or visit Thrivent.com for performance results current to the most recent month-end.*

Institutional Class shares carry no sales charges.

Lipper figures do not include sales charges or fees. If included, returns would have been lower.

The Barclays Capital Aggregate Bond Index is an index that measures the performance of U.S. investment grade bonds. An index is unmanaged, and investments cannot be made directly into an index.

Bond Quality Rating Distribution⁵

¹This is subject to change.

²Average Life: Average length of time before the bond issuer pays the bond holder.

³Duration: A measure of a portfolio's price sensitivity to interest rate changes. The longer the portfolio's duration, the more sensitive it is to interest rate changes.

⁴Standard Deviation: A statistical measure of volatility. The higher the standard deviation, the riskier an investment is considered to be.

⁵Bond Quality Ratings Distribution: Thrivent Financial uses the most recent quarter-end credit ratings assigned by Moody's Investor Services, Inc. and Standard & Poor's Financial Services, LLC to issuers of individual securities in the Fund. When the agencies' ratings differ, Thrivent Financial uses the lower of the two ratings.
